Chapter 15 : Waiting For Prey in the Middle of the Web

*...Things

believed were
possible...*

*...He

happen.*

*until this
very day,

performed
miracles, right
before our

That man's words are never lies.

Everything about "justice" and "The Organization."

And that's why we believe him.

If he says that it's the end...

...It really is the end.

If the Kamadeemon's leg strength was just as great as a horse's for a moment, they would be able to endure similarly long distances.

They have to rely on a method of jumping without the use of their wings.

they are frequently taken in and raised as pets, however...

As a result of that projected jumping ability,

they have been called "The Horse that Nests within the Stove."

...Since they have an animal-like form and robust hind legs,

Note: Kamadeemon literally means "stove horse."

they would often perish when raised in this way.

...Since they frequently crash into the walls of their small containers,

.....

...because
I wanted
to do so.

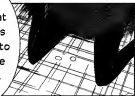

I did
not kill
him...

If...

Even

Well, I

here.
